Projects

[Biddi](#) - Web App for Landscapers

July 2023 – Present

Software Developer

- Helped design and create front end pages for easy user accessibility using TypeScript and React
- Assisted with back end development to ensure efficiency between the database and front end code
- Worked as a team to ensure consistency with the code throughout the application

[BasketFlyer](#) - 2D Basketball Game

Nov 2023 - Present

Software Developer

- Employing GitHub, implementing version control to streamline project development. Utilizing branches for individual feature development, facilitating parallel work and smooth integration of enhancements.
- Implemented user account creation using MongoDB to securely store and manage user progress, preferences, and other pertinent data, ensuring a personalized experience for each user throughout the application.
- Orchestrated the planning and development of a 2D basketball application for web browsers, showcasing expertise in web development, especially Javascript.

Experience

CNA - Beehive Homes Assisted Living

March 2020 - August 2020, Present

- Collaborated seamlessly with a multidisciplinary healthcare team to provide comprehensive and patient-centered care
- Demonstrated strong verbal and written communication skills in conveying patient updates, changes in condition, and care plans to healthcare professionals
- Actively supported team members during peak periods, willingly taking on additional responsibilities and assisting colleagues to maintain a positive work environment
